

SEA SALT **FIZZ**

WHAT?

AUTENTICO SEA SALT FIZZ is a part of the **CREATIVE POWDER** range and it consists of a powder that -when mixed with any colour of Autentico Vintage-creates stunning craters of paint leaving a very special finish.

WHERE?

SEA SALT FIZZ can be used indoors on walls or on furniture, lamp bases and such items.

HOW?

SEA SALT FIZZ consists of a mixture of 25-30 % citric acid. This is slightly irritating, especially when in contact with eyes. Therefore we recommend wearing safety goggles and gloves when working with **SEA SALT FIZZ**.

Mix 10-30% **SEA SALT FIZZ** to your volume part of Autentico Vintage. Do not add too much Sea Salt Fizz to avoid lumps. You will notice the mixture will start to fizzle. Then apply by brush on surface. Mixture will continue to fizzle with “paint craters” as a result.

Use your imagination to create cool patches of different colours.

You can add Sea Salt Fizz to other mixtures of Creative Powders too, especially with **RUST IN A JAR** to create a rough rusted surface.
